**Period for Reply** -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

- 1) ☒ Responsive to communication(s) filed on 29 February 2008.
- 2a) ☐ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Claims 6-9 and 13-15 have been canceled. Claims 1-5, 10-12 and 16-21 are pending.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States,

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Sperl.

Sperl discloses a baking tray, the tray comprising a base (bottom wall of upper section 6), an angled support (the right sidewall of upper section 6 as shown in Fig. 1-3 and socket 7) attached to the base, an aperture (socket 7) on the angled support, stick (shank 8) and food (solid food product M) suspended in air and not in contact with the baking tray shows one configuration, the socket 7 and the aperture are positioned and configured to support the stick in a horizontal position parallel to the base by using (1) an adhesive, (2) an angled adapter or (3) by wedging the free end of the stick into the socket so that any of the three manners of attachment results in the stick being horizontal and parallel to the base. The upper section 6 is metallic and considered an oven-proof material. The baking tray is used in either a conventional or microwave oven. The angled support is inclined with respect to the base.

The aperture of claim 1 is intended for inserting a skewer so that the skewer is generally horizontal and parallel to the base. Claim 1 contains the aperture only and not the skewer. The aperture must be capable of securing the skewer generally horizontal which the inclined aperture would accomplish if the skewer is properly bent.

Claims 1-5, 10-12 and 16-21 are rejected under 35 U.S.C. 102(e) as being anticipated by Sculuca.

Sculuca discloses a baking tray (skewer holder), the tray comprising a base (121), an angled support (124 or 127), an aperture or apertures (openings in expanded mesh steel material of skewer holder at a sloped side of a triangular support element 126, 127). The steel is considered an oven-proof material. The baking tray is used in grills, ovens or other locations.

Applicant's arguments filed February 29, 2008 have been fully considered but they are not persuasive.

Re Sperl, the elements of Sperl have been more clearly stated in the rejection. The stick limitations are intended use: (1) support of food, (2) insertion into aperture, (3) elevated above base, and (4) stick supported generally horizontally and parallel to the base. The positively recited elements of claim 1; base, angled support and aperture need only to be capable of supporting a stick with food to accomplish items 1-4.

Re Sculuca, applicant submits that Sculuca doesn't teach at least one aperture... However, the aperture is clearly stated to be an opening in the mesh steel material of the holder. The limitations pertaining to a straight stick or skewer are intended use limitations. Sculuca need only be capable of use with a straight stick rather than needing to show this element.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after

the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
